| <b>Simbol:</b> | SILI150X220 |
|----------------|-------------|

|                       |                          |
|-----------------------|--------------------------|
| <b>Grupă produse:</b> | Radiatoare - echipamente |
|-----------------------|--------------------------|

## Parametri produs

|                                      |                   |
|--------------------------------------|-------------------|
| <b>Type of heatsink accessories:</b> | heat transfer pad |
|--------------------------------------|-------------------|

|                                   |                        |
|-----------------------------------|------------------------|
| <b>Kind of heat transfer pad:</b> | din cauciuc și silicon |
|-----------------------------------|------------------------|

|                 |       |
|-----------------|-------|
| <b>Lungime:</b> | 0,22m |
|-----------------|-------|

|                |       |
|----------------|-------|
| <b>Lățime:</b> | 0,15m |
|----------------|-------|

|                 |        |
|-----------------|--------|
| <b>Grosime:</b> | 0,23mm |
|-----------------|--------|

|                                |       |
|--------------------------------|-------|
| <b>Conductivitate termică:</b> | 1W/mK |
|--------------------------------|-------|

|                               |         |
|-------------------------------|---------|
| <b>Clasă inflamabilitate:</b> | UL94V-0 |
|-------------------------------|---------|

|                              |             |
|------------------------------|-------------|
| <b>Temperatura de lucru:</b> | -60...200°C |
|------------------------------|-------------|

|                  |                                           |
|------------------|-------------------------------------------|
| <b>Versiune:</b> | fără adeziv, ranforsate cu vată de sticlă |
|------------------|-------------------------------------------|

|                                   |         |
|-----------------------------------|---------|
| <b>Rezistență la rupere min.:</b> | 5kV/div |
|-----------------------------------|---------|

## Informații suplimentare

|                        |          |
|------------------------|----------|
| <b>Greutate brută:</b> | 0,012 kg |
